Production Knowledge: Print Preparation, Color Correction, CMYK and RGB Standards
Other Competencies: File Management, Mockup Creation, Content Visualization, Art Direction

WORK EXPERIENCE

Dibatech — Graphic Designer

April 2024 – Present | Lagos, Nigeria

Responsible for developing creative visual assets that support digital products, marketing materials, and company branding. In this role, I work closely with UI teams to create interface graphics, icons, and illustrations for software platforms. I also collaborate with marketing teams to produce banners, brochures, social media graphics, and promotional visuals. My work involves maintaining the company's design standards, ensuring visual consistency, and improving brand identity through modern design approaches. I participate in creative planning sessions and contribute ideas that shape product aesthetics and user perception.

VisionSpark Media — Junior Graphic Designer

March 2022 – March 2024 | Lagos, Nigeria

At VisionSpark Media, I supported senior designers in crafting campaign visuals and enhancing brand awareness for clients across retail, tech, and educational sectors. I prepared design concepts, refined client-provided materials, and adapted branding

guidelines across various formats. I contributed to logo development, print-ready materials, packaging layouts, and digital marketing assets. I also assisted with photo editing, design reviews, and preparing final artwork for printers and online platforms. During this period, I strengthened my mastery of typography, color theory, and multi-platform design adaptation.

CloudNet Labs — Design Intern

June 2021 – February 2022 | Remote

As a Design Intern, I assisted in creating basic visual assets, preparing presentation slides, updating brand templates, and supporting senior designers on internal and client projects. I learned essential design workflows, organized design assets, and practiced converting rough ideas into polished visual drafts. This experience helped me develop a professional design foundation and improved my ability to collaborate remotely with design and product teams.

PROJECT PORTFOLIO

Comprehensive Brand Identity for a Lifestyle Company

Developed a brand identity system including logo variations, typography structure, color palettes, iconography, and marketing templates. Created a full brand guide that improved recognition and consistency across the company's print and digital channels.

Visual Campaign for a Tech Product Release

Designed promotional assets for a software launch, including banners, landing page graphics, visual mockups, and social media announcement designs. Ensured stylistic alignment with the existing product interface to strengthen brand cohesion.

Corporate Brochure and Print Catalog Design

Produced multi-page catalog layouts for company products and services. Prepared print-ready documents, optimized images, and selected typography to ensure clarity, readability, and aesthetic appeal.

Social Media Visual Suite for a Retail Brand

Created a large set of social media graphics including product spotlights, engagement posts, promotional content, and thematic templates. Applied consistent branding across all visuals and implemented design elements that improved user interaction.

Illustration and Icon Library for a Software Platform

Designed detailed illustrations and icon sets used within UI screens and marketing pages. Ensured clarity at multiple sizes and created a cohesive style to enhance visual communication within the product interface.
