

BACKEND ENGINEER DOSSIER

Profile Identity Sheet

Full Name: Emmanuel Chukwuma

Role: Backend Software Developer (2+ Years)

Contact Line: +234 812 3456 789

Email Node: emmanuel.chukwuma@example.com

LinkedIn Gateway: linkedin.com/in/emmanuel-chukwuma

Professional Overview

A pragmatic backend engineer focused on building stable infrastructures, secure APIs, and scalable server systems. Passionate about clean architecture, automated workflows, and backend performance tuning. Enjoys crafting systems that “just work,” even under pressure.

Work Timeline Matrix

1. DibaTech — Backend Engineer (Present – 2023)

- Architected and maintained micro-services handling authentication, billing, and internal communications.
- Implemented monitoring pipelines using logs + metrics for improved system visibility.
- Enhanced API response times by 35% through database query optimization and caching.
- Collaborated with frontend squads to standardize API contracts and error-handling structures.

2. ByteNest Systems — Junior Backend Developer (2023 – 2022)

Key Contributions:

- Built REST endpoints supporting user onboarding and payment workflows.
- Integrated third-party services (SMS, payments, email).
- Wrote automated tests improving coverage from 40% to 75%.
- Participated in peer-review cycles to maintain code quality.

Technical Arsenal

- **Languages:** Python, JavaScript (Node.js), Go (basic)
- **Frameworks:** Express.js, FastAPI, Django REST Framework
- **Databases:** PostgreSQL, MongoDB, Redis
- **Tools/DevOps:** Docker, GitHub Actions, Nginx, Linux
- **Concepts:** API Design, Scalability, Caching, Microservices, CI/CD

Highlighted Implementations

- **User Session Manager:** Improved token lifecycle management with Redis-backed systems.
- **Billing Microservice:** Modularized subscription logic; reduced bugs and improved update velocity.
- **Fault-Tolerant Notification Engine:** Designed a retry-safe message dispatcher with queueing.

Education & Credentials

B.Sc. Computer Science

University of Nigeria, Nsukka

Soft Skill Matrix

- Systems thinking
- Reliability under pressure
- Technical communication
- Decision-making & documentation
- Team synergy & collaboration

Personal Principles

- Build with clarity
- Document everything
- Automate repetitive tasks
- Prioritize user trust & data safety
