Location: Ilorin, Kwara State, Nigeria

Career Overview

Ibrahim is a dedicated Full-Stack Developer with 2 years of hands-on experience creating robust software solutions using modern frameworks. His experience spans frontend engineering, backend architecture, database performance tuning, and deploying applications to cloud environments. Known for his ability to translate business requirements into reliable, scalable systems.

Professional Experience

DibaTech Solutions — Full-Stack Developer

2023 – Present

At DibaTech, Ibrahim plays a core role in building enterprise-grade digital systems. His daily responsibilities include designing user-friendly interfaces, building REST APIs, and ensuring secure data flow between services.

Key achievements include:

- Implementing authentication flows and user-session lifecycle management.
- Building reusable UI components with React and Tailwind CSS.
- Developing logging and monitoring mechanisms for backend services.
- Refactoring legacy modules into modular, testable codebases.
- Improving deployment workflows by integrating Docker + GitHub Actions.

TechNova Digital — Associate Developer

2021 – 2022

During his time at TechNova, Ibrahim contributed heavily to both the frontend and backend layers of multiple client projects.

Key contributions:

- Participated in the full SDLC of a logistics management platform.
- Designed PostgreSQL schemas and optimized slow database queries.
- Wrote automated tests to ensure system stability and minimize regressions.
- Developed dashboard features, file uploads, and PDF generation modules.
- Collaborated with designers, QA engineers, and project managers on releases.

Skills & Tools

React.js, Redux Toolkit, Tailwind CSS, Node.js, Express, .NET Core, MongoDB, PostgreSQL, Redis, Docker, AWS S3, Git, Linux, Agile, Swagger, System Documentation

Education

B.Sc. Software Engineering — University of Ilorin

Key Projects

- **Real-Time Chat App** — WebSocket-based real-time messaging with typing indicators & group chats.
- **Healthcare Records System** — appointment booking, record management, encrypted data flow.
- **Real Estate Listing Platform** — advanced search filters, image uploads, agent dashboards.
