

MICHAEL ODUWOLE

Frontend Developer

Phone: +234 812 345 6789

Email: michael.oduwole@example.com

Location: Lagos, Nigeria

LinkedIn: www.linkedin.com/in/michael-oduwole

PROFESSIONAL SUMMARY

Frontend Developer with three years of hands-on experience designing, developing, and optimizing modern web interfaces. Skilled in React, JavaScript, and responsive design, with a strong foundation in accessibility, performance tuning, and component-based development. Known for writing clean, maintainable code and collaborating effectively with designers, backend engineers, and product teams. Passionate about improving user experience, modernizing legacy interfaces, and building efficient frontend architectures that scale.

CORE COMPETENCIES

Frontend Development

User Interface Engineering

Responsive and Adaptive Layouts

State Management using React Hooks and Context

API Integration and Data Handling

Performance Optimization and Code Refactoring

Version Control using Git and GitHub

Cross-Browser and Cross-Platform Compatibility

Agile and Scrum Collaboration

Design Interpretation using Figma and Adobe XD

Automated Testing and Component Validation

Technical Documentation and Knowledge Sharing

TECHNICAL SKILLS

Languages and Technologies: HTML5, CSS3, JavaScript ES6+, TypeScript, React, Next.js

Styling Frameworks: Tailwind CSS, SCSS, Styled Components

Design Tools: Figma, Adobe XD, Zeplin

Testing Tools: Jest, React Testing Library

Build and Deployment Tools: Webpack, Vite, GitHub Actions

Version Control and Collaboration: Git, GitHub, GitLab

Other Tools and Concepts: REST API Integration, JSON, UI Accessibility Guidelines, SEO Basics, Responsive Grid Systems, Component Architecture, State Management, Modern UI Patterns

WORK EXPERIENCE

Dibatech — Frontend Developer

April 2024 – Present | Lagos, Nigeria

At Dibatech, I am responsible for building highly functional and scalable frontend interfaces for enterprise-grade platforms. I collaborate with backend teams to ensure seamless API integration and maintain consistent data flow across components. My work includes transforming complex product requirements into intuitive user interfaces, improving performance through code review and component restructuring, and maintaining a reusable component library that accelerates development across different teams. I also contribute to UI testing, accessibility enhancements, and deployment improvements using modern build pipelines.

GlowTech Solutions — Junior Frontend Developer

March 2022 – March 2024 | Lagos, Nigeria

During my time at GlowTech Solutions, I developed interactive UI components, implemented responsive design principles, and translated design mockups into efficient code. I strengthened the reliability and performance of company interfaces by identifying rendering bottlenecks and optimizing asset delivery. I participated actively in Agile ceremonies, sprint planning, and product discussions, ensuring that frontend

considerations were represented in team decisions. I integrated REST APIs, improved error handling, documented UI patterns, and contributed to maintaining consistent coding standards across the team.

CloudNet Labs — Frontend Intern

June 2021 – February 2022 | Remote

As a Frontend Intern, I supported senior developers by assisting with component development, debugging, and interface testing. I converted UI wireframes and prototypes into functional layouts, gaining valuable experience in managing component states, debugging rendering issues, and ensuring user interface consistency. I also contributed to version control practices, improved component accessibility, and developed a strong foundation in React and modern JavaScript.

PROJECT EXPERIENCE

E-Commerce Web Interface Revamp

Designed and implemented a complete frontend overhaul of an e-commerce platform using React and modern CSS techniques. Improved user flow, enhanced accessibility, and reduced total page load time by optimizing media assets and restructuring components for better rendering performance. Integrated authentication pages, product filtering, and real-time cart updates.

Task Management Dashboard Application

Built a dashboard application that supported task creation, categorization, drag-and-drop movement, and progress tracking. Implemented responsive layouts that adapt smoothly across devices and developed a clean component structure to simplify future updates. Ensured accurate synchronization with backend APIs and enhanced data presentation using custom UI elements.

Professional Portfolio and Company Showcase Site

Developed a multi-section portfolio website emphasizing clean typography, modern animations, and SEO-friendly structure. Implemented reusable layout components and

integrated a contact form, service listings, and project highlights. Focused on accessibility and performance optimization for a smooth browsing experience.

Internal Design System Components

Assisted in creating a reusable design system for internal projects, including button variants, form controls, modals, layout elements, and navigation components. Ensured consistency across applications and simplified the onboarding process for new developers by documenting usage patterns.

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Computer Science
University of Lagos, Nigeria

Frontend Development Certificate
Udemy

JavaScript Algorithms and Data Structures
freeCodeCamp

Responsive Web Design Certification
freeCodeCamp
