

SAMUEL GLORY

Backend Developer

+234 812 3456 789 | samuel.glory@gmail.com | Lagos, Nigeria

www.linkedin.com/in/samuel-glory

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience designing, developing, and deploying scalable server-side applications. Skilled in Node.js, Express.js, MongoDB, and PostgreSQL, with strong experience in REST API design, authentication systems, cloud services, and microservice architecture. Known for clean architecture practices, performance optimization, and effective collaboration within Agile development teams.

TECHNICAL SKILLS

Languages & Frameworks: Node.js, Express.js, JavaScript (ES6+), Python

Databases: MongoDB, PostgreSQL, MySQL

API Development: RESTful APIs, GraphQL, JWT, OAuth2

Cloud & DevOps: Docker, AWS (EC2, S3, Lambda), Nginx, CI/CD Pipelines

Version Control & Tools: Git, GitHub, Postman, Redis, Linux CLI

Soft Skills: Team Collaboration, Problem Solving, Documentation, Analytical Thinking

WORK EXPERIENCE

Dibatech — Backend Developer

April 2024 – Present | Lagos, Nigeria

- Developed backend microservices using Node.js and Express.js.
- Implemented secure authentication and authorization using JWT and OAuth2.
- Optimized PostgreSQL database queries, improving response time by 30%.
- Designed REST APIs to support multiple frontend applications.
- Built Dockerized services and maintained GitHub Actions CI/CD pipelines.

CodeBase Systems — Junior Backend Developer

March 2022 – March 2024 | Lagos, Nigeria

- Built and maintained backend services for logistics and e-commerce platforms.
- Designed relational database schemas and managed migrations using Sequelize ORM.
- Integrated third-party APIs for payments and notifications.
- Automated internal reports and analytics using Python scripts.
- Participated in Agile sprints, code reviews, and documentation processes.

CloudNet Labs — Backend Intern

June 2021 – February 2022 | Remote

- Assisted senior developers with debugging and feature implementation.
- Performed database optimization tasks using MongoDB Atlas tools.
- Wrote unit and integration tests using Jest to improve backend reliability.
- Supported deployment procedures and service monitoring.

TECHNICAL PROJECTS

API Gateway Management System

Designed a Node.js-based API gateway for routing requests across microservices, implementing JWT validation, role-based access control, and request logging.

E-Commerce Backend System

Developed a full backend for product catalog, cart, and order workflows using Express, PostgreSQL, and Redis caching for improved read performance.

Task Management API

Created a task management service with CRUD operations, JWT authentication, pagination, and user-based access rules.

Cloud ETL Processor (AWS Lambda)

Built a serverless data pipeline using AWS Lambda, S3, and SNS for automated data ingestion, storage, and notifications.

EDUCATION & CERTIFICATIONS

B.Eng. Computer Engineering — University of Lagos, Nigeria

Backend Development Certificate — Udemy

AWS Cloud Practitioner — Amazon Web Services

Database Design & Optimization — Oracle Academy

Agile Development Principles — Coursera

ADDITIONAL INFORMATION

- Strong understanding of data structures and software design patterns.

- Experienced in deploying APIs to production using Docker and CI/CD pipelines.
- Passionate about backend scalability, distributed systems, and cloud architecture.
- Contributor to backend-focused open-source projects.
