

Tosin Adeyemi

Full-Stack Developer (Node / React / .NET hybrid)

Lagos, Nigeria · +234 812 3456 789 · tosin.adeyemi@tosinadeyemi.com ·

linkedin.com/in/tosin-adeyemi · github.com/tosinadev

CORE COMPETENCIES (top-of-resume)

- API Design & Development — REST, versioning, contract-driven design, Swagger documentation
- Frontend & UX Integration — React, component-driven architecture, accessible UI patterns
- Backend Engineering — Node.js/Express, ASP.NET Core, SQL Server, PostgreSQL
- Cloud & Deployment — Azure App Services, Azure DevOps, Docker, CI/CD pipelines
- Reliability & Observability — logging, metrics, alerting, error budgets
- Testing & Quality — unit, integration, E2E, TDD approaches

PROFESSIONAL PROFILE

Full-Stack Developer with 5 years delivering customer-facing web applications and internal tooling. Comfortable across the stack: shipping performant frontends, robust backend services, orchestrating deployments, and owning features end-to-end. Strong collaborator with product teams and designers; experienced mentoring juniors.

TECHNICAL TOOLBOX

React, Redux, TypeScript (familiar), ASP.NET Core, Node.js, Express, EF Core, SQL Server, PostgreSQL, Redis, RabbitMQ, Docker, Azure, GitHub Actions, Jest, Playwright (E2E), Swagger, Postman

EXPERIENCE

Dibatech — Full-Stack Engineer

Lagos, Nigeria | June 2020 – Present

- Owned a cross-functional product area: user account management, onboarding flow, and billing UI + backend. Delivered 6 major feature releases per year.
- Implemented a React-based self-service portal integrated with ASP.NET Core APIs. Reduced customer support tickets related to account issues by 40%.
- Built a resilient backend service for subscription billing with retry logic and idempotent operations; resolved duplicate-charge incidents and improved reconciliation accuracy.
- Implemented automated CI/CD pipelines with gated deployments and DB migration automation; decreased manual deployment steps by 80%.

- Led accessibility (a11y) improvements to the portal, increasing keyboard navigation coverage and addressing contrast issues.

Luminate Tech — Frontend Engineer

Lagos, Nigeria | Jan 2018 – May 2020

- Collaborated with product designers to implement responsive React components used across multiple web properties.
- Improved client-side performance by code-splitting, lazy-loading, and optimizing bundles; decreased Time to Interactive by ~25% on major pages.

Freelance / Contract — Web Developer

Various Clients (remote) | 2016 – 2017

- Delivered small business websites and admin dashboards; handled end-to-end delivery including deployment and monitoring.

MAJOR PROJECTS (detailed)

Subscription & Billing Portal (Dibatech) — React + ASP.NET Core

- Designed frontend flows and API contracts. Implemented secure payment flows, webhooks handling for payment provider, and robust reconciler microservice. Enabled support for recurring subscriptions and manual adjustments.

Internal Monitoring Dashboard — (Dibatech)

- Built an internal dashboard aggregating metrics from multiple services (health checks, queue lengths, error rates) with alert links for on-call engineers. Reduced alert fatigue by grouping and de-duplicating noisy alerts.

EDUCATION & TRAINING

B.Sc. (Second Class Upper), Computer Science — University of Lagos (2016)

Workshops & Courses: Advanced React patterns, API security & OAuth fundamentals

ACHIEVEMENTS & CONTRIBUTIONS

- Won internal “Delivery Excellence” recognition for shipping a cross-team feature that improved retention.
- Mentored interns and ran weekly knowledge-share sessions (testing best practices).
